DETAILED ACTION

Allowable Subject Matter

Claims 1, 3-5, 8-20, 22 (respectively renumbered 1-18) are allowed.

The following is an examiner's statement of reasons for allowance:

Iso et al (US 5,612,933) in view of Chainer et al (US 6,075,668) discloses a disk drive apparatus that contains various operating modes. Iso et al discloses a first and mode with a first rate independent of time duration for error processing as disclosed in Column 3 Lines 18-35). Additionally, Iso et al discloses a third mode for error processing and operation modes to include different data rates and reliability as disclosed in Column 2 Lines 48-59 and Column 4 Lines 23-38; however, is silent of varying time patterns.

Chainer et al discloses a system for placement of time patterns wherein various operation modes allow for read/write of data as discussed in Column 10 Lines 1-54.

However, the art of record fails to disclose, fairly suggest or teach the following limitation as recited in Claim 1:

"..a third mode having the first data rate and error processing for a second data reliability dependent on the time duration for error processing; and a fourth mode having the second data rate and error handling for the second data reliability dependent on the time duration for error processing.."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany
